Total: \$775.79

Notes

*****See Library Map on next sheet for new display layout*****

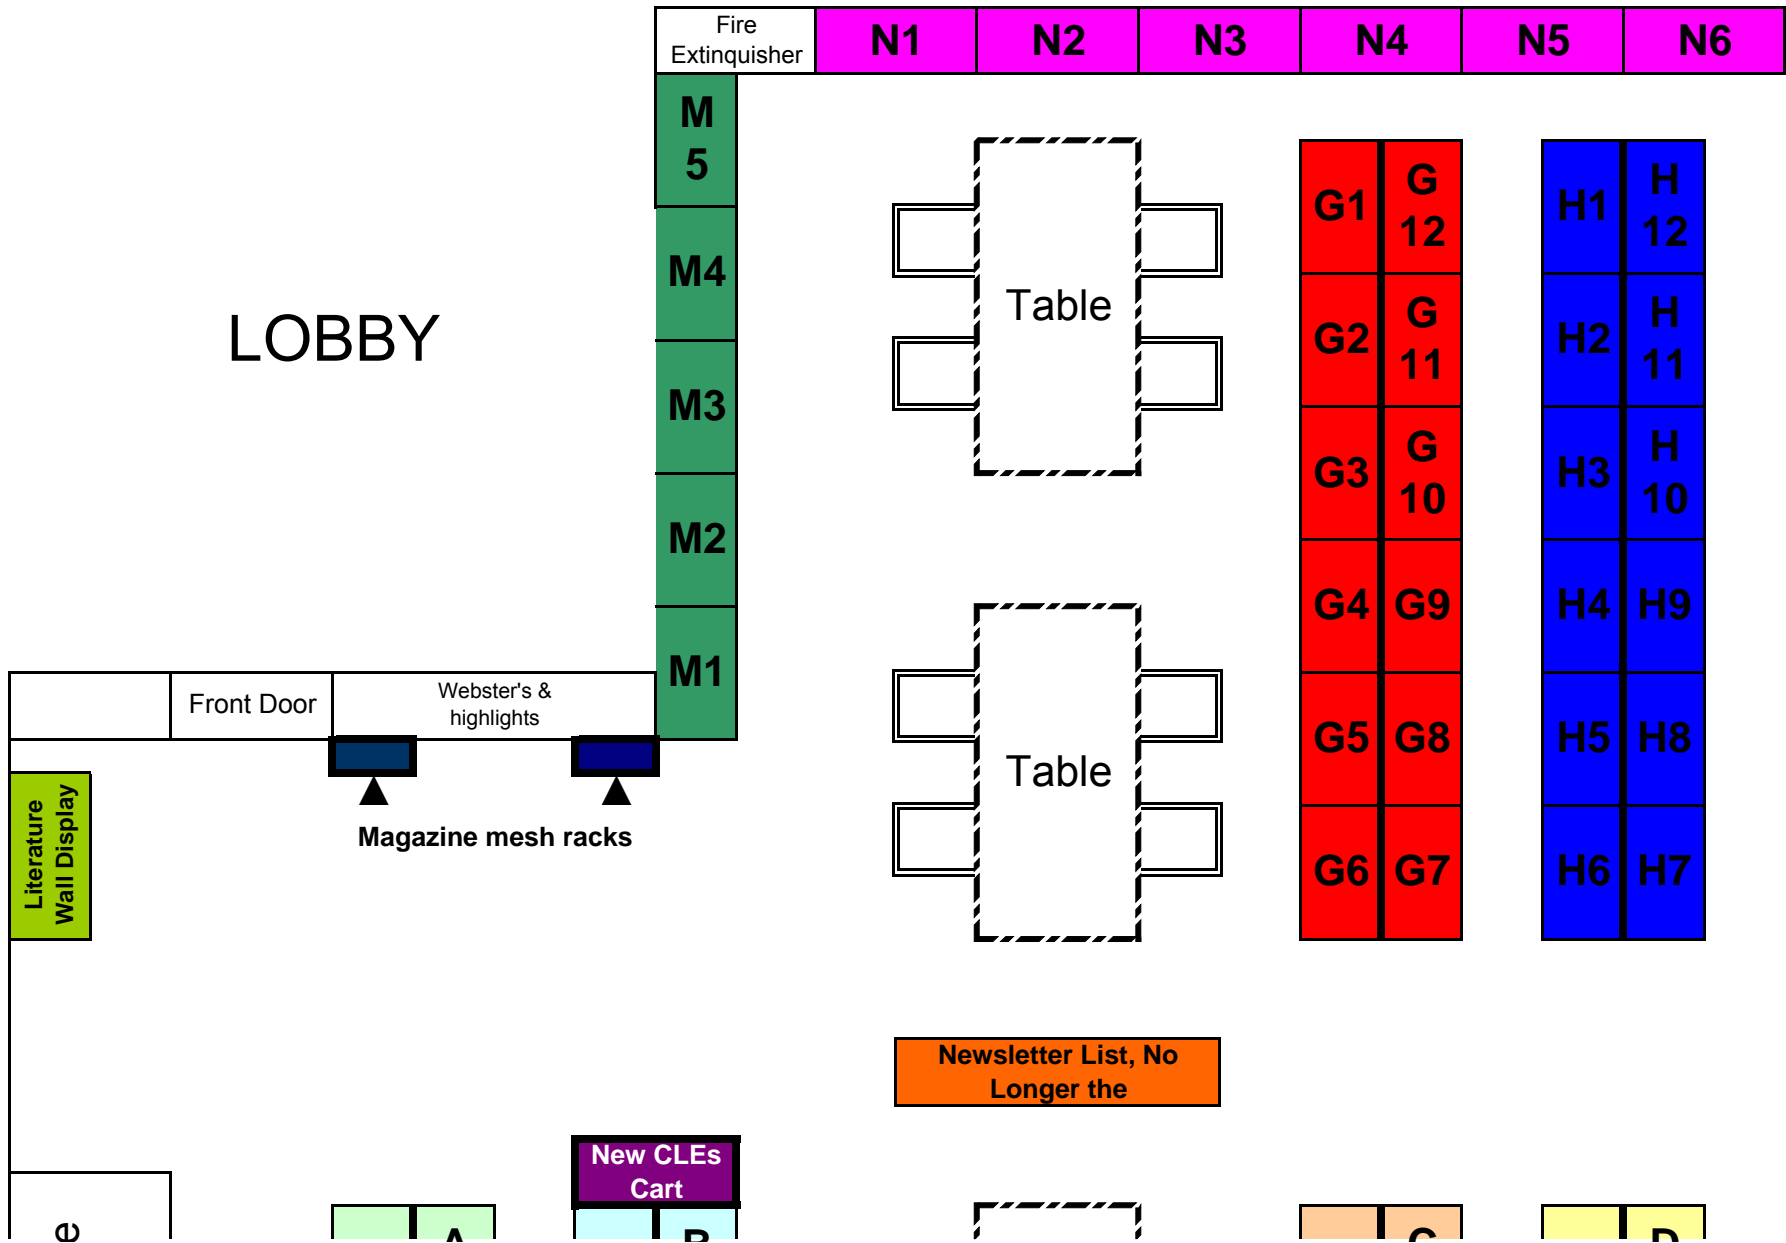

This would free up current new CLE wooden cart and location and be located at the end of Row B next to other current CLEs. Some books on display are too thick for the wire book easels we use.

Adds extra literature display; card catalog furniture would move in front of reading room's southeast window and become seasonal/highlight/plant display
See CLE Book Cart notes; takes pressure off current literature display table. Table would move to right of second computer station or some other public area location and still house some tabletop literature display (like OSB brochure holder and business cards--see below), etc.
Keeps newsletters or other non-self-supporting materials upright in magazine-size display pockets (no flopping forward!)

Would hold most frequently used postcard-sized referral cards at front counter (when they're ready)
For storing all referral cards on reference cart (new size won't fit in current "biz card" box)

Four-tier business card holder for display in public area

Would replace newsletter bulletin board (frees up board for other use?) and could hold current issues of some magazines
